RE: E/023/0105

Dear Ms. Heppler;

As per our discussion, attached is a small mines application on behalf of N.P.R. (U.S.) in relation to the Crypto Project, Fish Springs Mining district, Juab County. This notice for mining will replace exploration notice # E/023/0105, and that all unreclaimed disturbance associated with the exploration project will be incorporated as part of the mine notice.

The attached map shows the holes drilled under E/023/0105 in addition to permitted holes that were not drilled. Some of the new proposed holes under the attached mine permit are coincident with the undrilled holes under E/023/0105. The main purpose of this application is to provide for infilled drilling of 20 holes inside the proposed ultimate pit boundary. This includes 724 ft. of proposed new drill roads. An additional 14 holes are shown for stepout and exploration drilling. Most of these latter holes are on existing pads or roads.

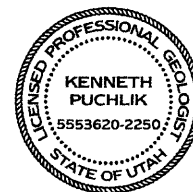

Also shown on the map is disturbance prior to N.P.R. ownership, in addition to the historical mine dumps. Most of the disturbance by N.P.R. under permit E/023/0105 has been reclaimed. This includes most drill roads, leaving only 724 ft (of a permitted 2000 ft) of existing roads that remain necessary for drill access under the attached application.

This permit is not for active mining, but for surface disturbance prior to pit development. Final pit design will await engineering and metallurgical testing and will be covered under a future large mine permit.

Please email me with any questions. I will be in the DNR building on other matters on August 12 and can directly discuss any necessary changes or additions at that time. Thank you for your consideration
